PROFILE

Passionate about software development and artificial intelligence, I am currently a full stack developer and a Master 2 MBDS student at Université Côte d'Azur. Holding a Bachelor's degree in Web and Design from IT University, I design and consume REST APIs, develop web applications with Angular/TypeScript and integrate AI tools. Rigorous and self-reliant, I am now looking to put my skills at the service of a team to take on new technical challenges.

PROFESSIONAL EXPERIENCE

Full Stack Developer

Aug 2025 — Present

Heaven Sound · Antananarivo

- Design and development of an integrated web platform (shop, donations, events, community) using agile methodology over 6 sprints: analysis, UML/data modeling (46 tables), 24 screens
- N-tier architecture: Angular 17, TypeScript and Tailwind CSS (front end), Node.js/TypeScript API, PostgreSQL and Firebase (Firestore)
- Online shop: catalog, cart, checkout, stock management with movement history and Excel/PDF export
- Donations and crowdfunding: Vanilla Pay integration (Mvola, Orange Money, Airtel Money, card via Stripe, PayPal), MGA/EUR payments, secure webhooks and emailed receipts
- Events: registration with unique QR codes, Google Maps, real-time scanning PWA and attendance statistics
- Secure authentication (two-factor PIN by email), role-based access control, real-time prayer wall and testimonies with moderation
- Admin back office: analytics dashboard (sales, donations, scans, testimonies) and data export
- In charge of the visual side
- Online demo: <https://heavensound.mg/>

ERPNext Integrator

Jan 2025 — Feb 2025

IT University (Academic project) · Antananarivo

- Integration of features into ERPNext.
- Integration of APIs connecting ERPNext to an external application.

MERN Full Stack Developer

Jan 2026 — Mar 2026

IT University (Academic project)

- Development of a shopping mall management web application with the MERN stack (MongoDB, Express.js, React and Node.js). Implementation of a REST API, secure authentication, and management of users, shops, products and orders.
- Online demo: <https://www.smarket.qzz.io/>

AI Developer (RAG)

Jul 2026 — Aug 2026

Personal project

- Design of a 100% local RAG system ("mini NotebookLM") to query your own PDF/TXT/MD documents in natural language. Complete pipeline: extraction, chunking, multilingual embeddings, semantic search and generation of sourced answers. Python, LangChain, ChromaDB, Ollama, Streamlit.

Software Developer — Desktop & REST API

Aug 2026 — Sep 2026

Personal project · Antananarivo

- Optimization of network calls through parallelization and caching.
- Development of a Windows client in Python/PyQt6 consuming a REST API: catalog, search, filters, pagination, metadata, seasons and episodes.
- Integration of a libVLC video player.
- Management of favorites, history and a local SQLite cache.
- Packaging as a Windows executable and development of an automatic update system.

Mobile & Backend Developer — TATITRA Project

Sep 2026

Personal / academic project · Antananarivo

- Design and development of a citizen reporting mobile application (Android/Kotlin, Jetpack Compose) with an offline-first architecture (Room, WorkManager)
- Development of a REST API (Node.js/Express) and a PostgreSQL database (Supabase) for data synchronization
- Development of a web administration interface (React) with a business validation workflow
- Design of a cross-validation mechanism with a scheduled task (node-cron) to automatically reopen cases after 7 days
- Pair work with MVVM architecture, unit tests (JUnit, Node test) and Git management
- Source code: github.com/LoicLooney/Tatitra-app

EDUCATION

Bachelor's Degree in Web and Design

2026

IT University

Master 1

2026

IT University

Master 2 MBDS

2026

Université Côte d'Azur

CERTIFICATIONS

AI-Powered SEO Audit: Diagnose, Optimize and Rank Fast (UDEMY)

2025

Introduction to Software Engineering

2025

Claude Academy Certification

2026

SKILLS

Programming languages: Java, Python, TypeScript, C#, Kotlin	
Web application development (Angular/TypeScript)	
REST API design & integration (Java, Node.js, Python)	
Desktop software development (Python, PyQt6)	
Android mobile development (Kotlin, Jetpack Compose)	
Relational databases (PostgreSQL, Oracle, MySQL)	
NoSQL databases (MongoDB, Firestore)	
Generative AI & LLMs (Prompt Engineering, AI tool integration)	
Systems modeling and design (UML, MVC)	Git/GitHub

SOFT SKILLS

Problem solving	Autonomy	Rigor	Adaptability
Time management	Team spirit	Active listening	Perseverance
Creativity	Leadership		

DRIVING LICENSE

B

ADDITIONAL INFORMATION

Interests: music and video games. Open to on-site or remote opportunities.
